

Respondent by Gender (Man or Woman)

● Woman ● Man

Respondent (Count)

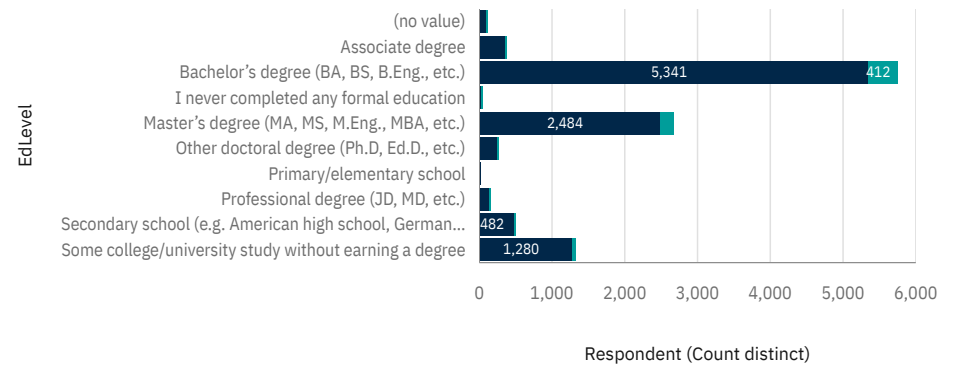

A line graph showing the relationship between Age and Respondent Count. The x-axis represents Age (ranging from 16 to 99) and the y-axis represents Respondent Count (ranging from 0 to 800). The data points are connected by a purple line, and each point is labeled with its corresponding count. The count starts at 3 for age 16, rises to a peak of 787 at age 28, and then generally decreases, with a slight increase at age 99 (28).
