Respondent by Gender (Man or Woman)

● Woman ● Man

Respondent (Count)

The graph displays the distribution of response counts by age for two groups: Men (blue line) and Women (orange line). The Y-axis represents the Respondent Count, ranging from 0 to 800. The X-axis represents Age, ranging from 16 to 99. The data points are labeled with their respective counts. The graph shows a peak in response count around age 28 for both genders, with a slight increase for women at age 28. The count drops significantly after age 30 and remains low for older ages.

Age	Man (Count)	Woman (Count)
16	3	6
18	109	29
20	406	203
22	581	406
24	679	581
26	738	722
28	722	787
30	651	722
